Cancer Letters, 64 (1992) 269–272
Elsevier Scientific Publishers Ireland Ltd.

Subject Index

Volume 64

Acetylaminofluorene, metabolism, human hepatocytes, DNA binding, 109
Aflatoxin B_1, aflatoxin B_1-epoxide, aflatoxin B_1-glutathione, rat glutatione transferases, 224
Aflatoxin B_1-epoxide, aflatoxin B_1, aflatoxin B_1-glutathione, rat glutatione transferases, 224
Aflatoxin B_1-glutathione, aflatoxin B_1, aflatoxin B_1-epoxide, rat glutatione transferases, 224
Alliums, esophageal cancer, diallyl sulfide, 39
Amiloride, estramustine, bleomycin, 171
21-aminosteroid antioxidant (U74500A, U74389F, U78518F), human breast cancer cells, mouse lymphoma cells, antiproliferative agents, 61
Anti-neoplastic agent, phytase, signal transduction, phytic acid, 195
Antibody-daunomycin conjugate, monoclonal antibodies, histiocytoma, tumor regression, 163
Antiestrogens, estrogen-induced kidney tumors, testicular tumors, 23
Antiproliferative agents, 21-aminosteroid antioxidant (U74500A, U74389F, U78518F), human breast cancer cells, mouse lymphoma cells, 61
Antiproliferative effect, breast cancer cells, melatonin, estrogen response pathway, 249
Antitumor activity, 2′-C-cyano-2′-deoxy-1-β-D-arabinofuranosylcytosine (CNDAC), human cancer, MTT-assay, chick embryo assay, nude mouse assay, 67
2′-C-cyano-2′-deoxy-1-β-D-Arabinofuranosylcytosine (CNDAC), antitumor activity, human cancer, MTT-assay, chick embryo assay, nude mouse assay, 67
Ascorbyl palmitate, curcumin, azoxymethanol, colonic epithelial cells, hyperproliferation, focal areas of dysplasia, 117
Azoxymethanol, curcumin, ascorbyl palmitate, colonic epithelial cells, hyperproliferation, focal areas of dysplasia, 117

BALB/c 3T3, 1,1,2,2-tetrachloroethane, cell transformation, tetradecanoylphorbol, initiation, promotion, 145
BALB/c mice, bromo-2'deoxyuridine, urethan, two-step carcinogenesis, 75
Bleomycin, amiloride, estramustine, 171
Bone marrow, cigarette smoke, histopathology, micronucleus test, pulmonary alveolar macrophages, *N*-acetyl-L-cysteine, 123
Breast cancer cells, antiproliferative effect, melatonin, estrogen response pathway, 249
Breast tumors, transgenic mice, oncogenes, salivary tumors, multifocality, 203
Bromo-2'deoxyuridine, urethan, two-step carcinogenesis, BALB/c mice, 75

C3H/10T1/2, proliferin, tumour promoter, molecular marker, 1
C-*fgr*, Epstein-Barr virus, immortalization, 11
Cancer, vanadium, neoplastic transformation, tumor promotion, carcinogenesis, 83
Canine mycosis fungoides, linoleate therapy, 17
Carcinogenesis, multihit model, doubly-hit cells, 91
Carcinogenesis, vanadium, cancer, neoplastic transformation, tumor promotion, 83
Cell transformation, 1,1,2,2-tetrachloroethane, BALB/c 3T3, tetradecanoylphorbol, initiation, promotion, 145
Chick embryo assay, 2′-C-cyano-2′-deoxy-1-β-D-arabinofuranosylcytosine (CNDAC), antitumor activity, human cancer, MTT-assay, nude mouse assay, 67
Cigarette smoke, histopathology, micronucleus test, bone marrow, pulmonary alveolar macrophages, *N*-acetyl-L-cysteine, 123
Cisplatin, hematoxicity, procaine, 55
Colonic epithelial cells, curcumin, ascorbyl palmitate, azoxymethanol, hyperproliferation, focal areas of dysplasia, 117
Curcumin, ascorbyl palmitate, azoxymethanol, colonic epithelial cells, hyperproliferation, focal areas of dysplasia, 117

Diallyl sulfide, alliums, esophageal cancer, 39
Dietary nitrate burden, salivary nitrate/nitrite, high risk area, population study, endogenous nitrosation, 133
Differentiation, neuroblastoma, laminin, retinoic acid, 31

1,25-Dihydroxyvitamin D3, glyceraldehyde-3-phosphate dehydrogenase, malignant human mammary cell lines, 219
Dimethylbenz[*a*]anthracene, hamsters, golden Syrian, glutathione transferase, 241
DNA adduct, engine oil, ^{32}P-postlabelling analysis, 137
DNA binding, acetylaminofluorene, metabolism, human hepatocytes, 109
Doubly-hit cells, carcinogenesis, multihit model, 91

Endogenous nitrosation, salivary nitrate/nitrite, high risk area, population study, dietary nitrate burden, 133
Engine oil, DNA adduct, ^{32}P-postlabelling analysis, 137
Epstein-Barr virus, c-*fgr*, immortalization, 11
Esophageal cancer, alliums, diallyl sulfide, 39
Estradiol, pituitary tumors, kallikrein, 211
Estramustine, amiloride, bleomycin, 171
Estrogen response pathway, antiproliferative effect, breast cancer cells, melatonin, 249
Estrogen-induced kidney tumors, antiestrogens, testicular tumors, 23

Flow cytometry, photodynamic therapy, photofrin II, mitomycin C, 155
Focal areas of dysplasia, curcumin, ascorbyl palmitate, azoxymethanol, colonic epithelial cells, hyperproliferation, 117

Gamma-glutamyltranspeptidase, 6-mercaptopurine, liver carcinogenesis, glutathione *S*-transferase placental form, 99
Ganciclovir, herpes thymidine kinase, gene therapy, 257
Gene therapy, herpes thymidine kinase, ganciclovir, 257
Glutathione *S*-transferase placental form, 6-mercaptopurine, liver carcinogenesis, gamma-glutamyltranspeptidase, 99
Glutathione transferase, hamsters, golden Syrian, dimethylbenz[*a*]anthracene, 241
Glyceraldehyde-3-phosphate dehydrogenase, malignant human mammary cell lines, 1,25-dihydroxyvitamin D3, 219
Golden Syrian, hamsters, dimethylbenz[*a*]anthracene, glutathione transferase, 241

Hamsters, golden Syrian, dimethylbenz[*a*]anthracene, glutathione transferase, 241
Hematoxicity, cisplatin, procaine, 55
Herpes thymidine kinase, ganciclovir, gene therapy, 257
High risk area, salivary nitrate/nitrite, population study, dietary nitrate burden, endogenous nitrosation, 133
Histiocytoma, monoclonal antibodies, antibody-daunomycin conjugate, tumor regression, 163
Histopathology, cigarette smoke, micronucleus test, bone marrow, pulmonary alveolar macrophages, *N*-acetyl-L-cysteine, 123
Human breast cancer cells, 21-aminosteroid antioxidant (U74500A, U74389F, U78518F), mouse lymphoma cells, antiproliferative agents, 61
Human cancer, 2′-C-cyano-2′-deoxy-1-β-D-arabinofuranosylcytosine (CNDAC), antitumor activity, MTT-assay, chick embryo assay, nude mouse assay, 67
Human hepatocytes, acetylaminofluorene, metabolism, DNA binding, 109
Hyperproliferation, curcumin, ascorbyl palmitate, azoxymethanol, colonic epithelial cells, focal areas of dysplasia, 117

Immortalization, c-*fgr*, Epstein-Barr virus, 11
Initiation, 1,1,2,2-tetrachloroethane, cell transformation, BALB/c 3T3, tetradecanoylphorbol, promotion, 145
Interleukin-1, interleukin-6, tumor necrosis factor, NO_2, muramyl dipeptide, 187
Interleukin-2 receptor, interleukin-4, large granular lymphocytes, 43
Interleukin-4, large granular lymphocytes, interleukin-2 receptor, 43
Interleukin-6, interleukin-1, tumor necrosis factor, NO_2, muramyl dipeptide, 187

Kallikrein, pituitary tumors, estradiol, 211

Laminin, neuroblastoma, differentiation, retinoic acid, 31
Large granular lymphocytes, interleukin-4, interleukin-2 receptor, 43
Linoleate therapy, canine mycosis fungoides, 17
Liver carcinogenesis, 6-mercaptopurine, glutathione *S*-transferase placental form, gamma-glutamyltranspeptidase, 99

Malignant human mammary cell lines, glyceraldehyde-3-phosphate dehydrogenase, 1,25-dihydroxyvitamin D3, 219
Melatonin, antiproliferative effect, breast cancer cells, estrogen response pathway, 249
6-Mercaptopurine, liver carcinogenesis, glutathione *S*-transferase placental form, gamma-glutamyltranspeptidase, 99
Metabolism, acetylaminofluorene, human hepatocytes, DNA binding, 109
Micronucleus test, cigarette smoke, histopathology, bone marrow, pulmonary alveolar macrophages, *N*-acetyl-L-cysteine, 123
Mitomycin C, photodynamic therapy, photofrin II, flow cytometry, 155

Molecular marker, proliferin, tumour promoter, C3H/10T1/2, 1
Monoclonal antibodies, histiocytoma, antibody-daunomycin conjugate, tumor regression, 163
Mouse lymphoma cells, 21-aminosteroid antioxidant (U74500A, U74389F, U78518F), human breast cancer cells, antiproliferative agents, 61
MTT-assay, 2′-C-cyano-2′-deoxy-1-β-D-arabinofuran-osylcytosine (CNDAC), antitumor activity, human cancer, chick embryo assay, nude mouse assay, 67
Multidrug resistance, staurosporine, *N*-ethoxycarbonyl-7-oxo-staurosporine, protein kinases, P388 cells, 177
Multifocality, transgenic mice, oncogenes, breast tumors, salivary tumors, 203
Multihit model, carcinogenesis, doubly-hit cells, 91
Muramyl dipeptide, interleukin-1, interleukin-6, tumor necrosis factor, NO_2, 187
Mutagenicity, smoke-heat, sperm shape abnormality, Swiss albino mice, 51

N-acetyl-L-cysteine, cigarette smoke, histopathology, micronucleus test, bone marrow, pulmonary alveolar macrophages, 123
N-ethoxycarbonyl-7-oxo-staurosporine, staurosporine, protein kinases, multidrug resistance, P388 cells, 177
Neoplastic transformation, vanadium, cancer, tumor promotion, carcinogenesis, 83
Neuroblastoma, laminin, differentiation, retinoic acid, 31
Nitro derivatives, piperine, nitrosation, potentially mutagenic, 235
Nitrosation, piperine, nitro derivatives, potentially mutagenic, 235
NO_2, interleukin-1, interleukin-6, tumor necrosis factor, muramyl dipeptide, 187
Nude mouse assay, 2′-C-cyano-2′-deoxy-1-β-D-arabinofuranosylcytosine (CNDAC), antitumor activity, human cancer, MTT-assay, chick embryo assay, 67

Oncogenes, transgenic mice, breast tumors, salivary tumors, multifocality, 203

^{32}P-postlabelling analysis, DNA adduct, engine oil, 137
P388 cells, staurosporine, *N*-ethoxycarbonyl-7-oxo-staurosporine, protein kinases, multidrug resistance, 177
Photodynamic therapy, photofrin II, mitomycin C, flow cytometry, 155
Photofrin II, photodynamic therapy, mitomycin C, flow cytometry, 155
Phytase, anti-neoplastic agent, signal transduction, phytic acid, 195
Phytic acid, phytase, anti-neoplastic agent, signal transduction, 195
Piperine, nitrosation, nitro derivatives, potentially mutagenic, 235
Pituitary tumors, kallikrein, estradiol, 211
population study, salivary nitrate/nitrite, high risk area, dietary nitrate burden, endogenous nitrosation, 133
Potentially mutagenic, piperine, nitrosation, nitro derivatives, 235
Procaine, cisplatin, hematoxicity, 55
Proliferin, tumour promoter, C3H/10T1/2, molecular marker, 1
Promotion, 1,1,2,2-tetrachloroethane, cell transformation, BALB/c 3T3, tetradecanoylphorbol, initiation, 145
Protein kinases, staurosporine, *N*-ethoxycarbonyl-7-oxo-staurosporine, multidrug resistance, P388 cells, 177
Pulmonary alveolar macrophages, cigarette smoke, histopathology, micronucleus test, bone marrow, *N*-acetyl-L-cysteine, 123

Rat glutatione transferases, aflatoxin B_1, aflatoxin B_1-epoxide, aflatoxin B_1-glutathione, 224
Retinoic acid, neuroblastoma, laminin, differentiation, 31

Salivary nitrate/nitrite, high risk area, population study, dietary nitrate burden, endogenous nitrosation, 133
Salivary tumors, transgenic mice, oncogenes, breast tumors, multifocality, 203
Signal transduction, phytase, anti-neoplastic agent, phytic acid, 195
Smoke-heat, mutagenicity, sperm shape abnormality, Swiss albino mice, 51
Sperm shape abnormality, mutagenicity, smoke-heat, Swiss albino mice, 51
Staurosporine, *N*-ethoxycarbonyl-7-oxo-staurosporine, protein kinases, multidrug resistance, P388 cells, 177
Swiss albino mice, mutagenicity, smoke-heat, sperm shape abnormality, 51

Testicular tumors, antiestrogens, estrogen-induced kidney tumors, 23
1,1,2,2-Tetrachloroethane, cell transformation, BALB/c 3T3, tetradecanoylphorbol, initiation, promotion, 145
Tetradecanoylphorbol, 1,1,2,2-tetrachloroethane, cell Transformation, BALB/c 3T3, initiation, promotion, 145
Transgenic mice, oncogenes, breast tumors, salivary Tumors, multifocality, 203
Tumor necrosis factor, interleukin-1, interleukin-6, NO_2, muramyl dipeptide, 187
Tumor promotion, vanadium, cancer, neoplastic transformation, carcinogenesis, 83

Tumor regression, monoclonal antibodies, histiocytoma, antibody-daunomycin conjugate, 163
Tumour promoter, proliferin, C3H/10T1/2, molecular marker, 1
Two-step carcinogenesis, bromo-2'deoxyuridine, urethan, BALB/c mice, 75
Urethan, bromo-2'deoxyuridine, two-step carcinogenesis, BALB/c mice, 75
Vanadium, cancer, neoplastic transformation, tumor promotion, carcinogenesis, 83

Cancer Letters, 64 (1992) 273–274
